PROFILE

Product Owner with end-to-end delivery experience across a multi-touchpoint consumer platform at Cake by VPBank – spanning a ticketing app, an SDK embedded in the Cake banking super-app, and a venue check-in app with admin portal. Skilled in translating business requirements into clear, production-ready user stories and acceptance criteria, working directly with engineering without a BA layer. Experienced collaborating with BI to define KPI dashboards and surface operational insights. Applies AI tooling to accelerate product documentation including backlog preparation and PRD drafting. English fluent; applied daily.

EXPERIENCE

Cake by VPBank

Feb 2025 – Present

Associate Tech Product Manager – CTicket Platform

- Owned product backlog and end-to-end delivery across 30+ features; wrote user stories and acceptance criteria directly with engineering, coordinated UAT across product, operations, and marketing, and maintained zero critical post-release incidents across all major launches
- Delivered a multi-touchpoint platform suite – consumer ticketing app, CTicket SDK embedded within the Cake super-app, and a venue check-in app with an admin portal for role-based access configuration – supporting 96+ events, 52 partners, and 93,904+ tickets issued in 2025 (235% of target)
- Delivered core consumer features including presales with exclusive access codes, ticket transfer flows, Group Buy mechanics, in-app ads placements, and tournament mode for esports events; defined KPI and reporting requirements in collaboration with BI to track platform performance across releases
- Managed release coordination for high-demand events including K-Star Concert and G-Dragon World Tour (up to 40,000 tickets per day, sold out within hours), T1 Vietnam Fanmeeting, and VPBank International Marathon

Cake by VPBank

2024

Tech Product Owner Intern – KYC Platform

- Contributed to digital onboarding product in a compliance-driven fintech environment; collaborated with Compliance, Legal, Engineering, and Design to translate regulatory constraints into product requirements
- Authored 100+ user stories across 8 sprint releases; supported delivery of NFC-based identity verification feature; validated outcomes via usability testing and post-release analytics

PROJECTS

Elite Fitness

2023 – Present

Product Owner & UI/UX Designer

- Owned end-to-end product delivery from user research and roadmap definition to Figma prototyping, developer coordination, and App Store release (Elite Fitness FTISU); applied iterative usability testing to identify drop-off patterns and improve feature adoption
- Research on AI-driven personalization in fitness applications published at Future Data & Security Engineering 2024 (Springer LNCS)

EDUCATION

University of Information Technology – VNU-HCM

2021 – 2025

B.Sc. in E-Commerce GPA: 8.83/10 IELTS: 6.5
